

## Syntax review 2 (exercises)

Complete the code snippets below so that they become valid JavaScript code.

### Exercise 1

```
city = "Amsterdam"  
    = New York  
  
// Sample usage  
console.log(city) → outputs New York
```

### Exercise 2

```
    getNameLength name {  
return    .length  
}  
  
// Sample usage  
getNameLength("John") → 4
```

### Exercise 3

```
function double(    )  
    number * 2  
  
// Sample usage  
double(2) → 4
```

## Exercise 4

```
function getNextCentury(year) {  
    console.log(year + 100)  
    return year + 100  
}  
  
// Sample usage  
getNextCentury(50) → returns and outputs 150  
getNextCentury(100) → returns and outputs 200
```

## Exercise 5

```
let name = "alex"  
    shouting = name.toUpperCase()  
  
// Sample usage  
console.log(name) → outputs "alex"  
console.log(shouting) → outputs "ALEX"
```

## Exercise 6

```
let name = "SaM"  
let lowercased = name.toLowerCase()  
  
// Sample usage  
console.log(name) → outputs "SaM"  
console.log(lowercased) → outputs "sam"
```
